**Atomic Spectroscopy Atomization**

- **Flame Atomization**
  - used for liquid samples
  - liquid pulled by action of nebulizer
  - nebulizer produces spray of sample liquid
  - droplets evaporate in spray chamber leaving particles
  - fuel added and ignited in flame
  - atomization of remaining particles and spray droplets occurs in flame
  - optical beam through region of best atomization

The diagram illustrates the flame atomization process. It shows a **nebulizer** at the top where **liquid** is drawn in and converted into a spray. This spray enters a **spray chamber** where it meets an **oxidant (air or N<sub>2</sub>O)**. Below the spray chamber is a **burner head** where **fuel (HCCH)** is added and ignited. The **sample in** is drawn into the nebulizer, and a **light beam** is directed through the region of best atomization.

10	Java Development Kit 1.5.0 or Higher Versions used notepad as the editor.	 The logo for the Java Development Kit (JDK) is displayed. It features the letters 'JDK' in a large, bold, sans-serif font. The 'J' is yellow, the 'D' is orange, and the 'K' is red. Below the letters are three horizontal bars of increasing width and decreasing height, colored yellow, orange, and red respectively. The words 'JAVA', 'DEVELOPMENT', and 'KIT' are written in white, uppercase letters on these bars.
11	Oracle 10g Express Edition for Database Management Systems	 The Oracle Database 10g logo is shown, featuring the word 'ORACLE' in a black box, '10g' in large red font, and 'DATABASE' in a black box below. To the right of the logo is a list of features under the heading 'Object relational data': Documents (with a document icon), Multimedia (with a globe icon), and Messages (with a mail icon). The entire graphic is set against a light gray background with a dark vertical bar on the right.
